2. WOOL.

The total production of wool in New South Wales for 1938-39 was approximately 436,000,000 lb. as compared with 495,027,000 lb. in 1937-38. Total production in 1939-40 is expected to be nearly as great as in 1937-38.

Under agreement with the British Government the 1939-40 wool clip will be disposed of by appraisement on an average price of 10.25d. sterling or 13.4375d. per lb. Australian Currency.

Numerous commodities were exempted from tax as from 26th October, 1933, 1st August, 1934, 25th October 1935, and 26th September, 1936. Consequently, many traders dealing exclusively in exempt goods ceased to supply returns and the proportion of wholesale trade covered by the records was progressively reduced. Allowance on this account should be made when comparing recent totals with those for 1936 and earlier years.

10. RETAIL TRADE.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

* Including new mortgages and renewals as registered.

† Totals for months are approximate and aggregate differs slightly from annual total.

The average monthly transactions for period 1925-1929 were:—Sales, £4,619,000; and Mortgages, £4,042,000.

NOTE.—Mortgages and liens in some instances secure fluctuating advances, the amount of which is not recorded in the legal instruments. The amounts shown relate substantially to mortgages of fixed amounts for fixed periods, and exclude fluctuating advances (such as overdrafts) secured by mortgage. Mortgages providing collateral security of subsisting mortgages are included.

In the nine months ended 30th September, 1939, mortgages, exclusive of those providing collateral security amounted to £15,977,000 as compared with £17,630,000 and £13,412,000 in the corresponding period of 1938 and 1937 respectively.

NOTES.

(1) The index of employment is the ratio of number in employment (first column of Table 22) to estimated number of wage earners available for employment. The index of unemployment is the residue, but both indexes are derived by modifying the census ratios in accordance with subsequent changes.

(2) "Number in employment" is virtually a direct record; "number of available wage earners" is an estimate derived by increasing the total of wage earners in employment (plus unemployed) at the Census of 1933 in ratio to the annual increase in persons aged 15 to 64 years. In order to increase the degree of precision in the index, adjustment is made in the number of available wage earners thus estimated to allow for (a) increase in the proportion of females who are wage earners (b) youths who were without occupation but were not recorded in the wage-earning group at the Census of 1933. Adjustment for seasonal variations in employment is not made except in respect of casual retail employees in December.

(3) At the census of 1933, 15,142 persons, or 1.8 per cent. of total dependent on employment, were unemployed by reason of illness, accident, etc., or voluntarily. These are excluded from the above indexes which relate to percentages of available wage earners employed and unemployed.

(4) The percentages of unemployment shown above are approximations relating to all wage earners of both sexes. Separate estimates for males and females cannot be made from the data available.

28. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values; adjustment being made where capital is written off or bonus shares issued.
